

Faber North Cliff – Mountain Hiking Snow Shoe

The North Cliff snowshoe was created with idea of offering an affordable and easy to use day hiking snowshoe for mountainous terrain. Our patented wing traction decking design makes efficient use of materials, allowing use to build snowshoe that is 20 % lighter than standard aluminium models, as well as making it greener, more affordable and easier to walk with. The North Cliff features our unique three adjustment heel lifter to reduce muscles fatigue during climbs. This snowshoe has all the technical specifications needed for anyone who is looking for a quality, long lasting all around snowshoe.

Product Specifications

These snowshoes are equipped with the Quattro 3ZE binding, a triple zenith buckle binding with toe box. The aluminium 4.5 inch-long front claw and the 5 inch-long rear crampon provide great traction on rugged terrain. The three adjustment heel lifter integrated in the heel plate eases climbing and is easily deployed either by hand or with the aid of a pole. Sizes (inches): 8x21 - 8x25 - 9x29 - 10x34.
