

## **Faber North Hiker – All Terrain Snow Shoe**

*This new generation of snowshoes is assembled with a new light and sturdy patented Wing Traction Decking, made out of low temperature impact co-polymer (- 40 Celsius), stronger than conventional soft decking. The sturdiness is due to the decking wing torsion, providing extra traction and creating exit holes for snow. The aluminium frame with curved open rear end is lighter, eases unloading of snow and avoids dragging effect while walking.*

### **Product Specifications**

*This snowshoe is equipped with a Trio 1LR binding (1 lever ratchet + toe box) plus a foot bed and heel piece design to maximize control of the snowshoe. This series is also equipped with a 4.5 inch long aluminium front crampon and a 3 inch long heel crampon for optimal traction on any terrain. Sizing (inches): 8x21 - 8x25 - 9x29 – 10x34.*
