

## **Faber North Kid - Children's Snow Shoe**

*Designed for kids but built with adult's snowshoes technology, the North Kid is lightweight, easy to use and durable. This series of kid snowshoes are made of aluminium tubing 6061-T6 of 5/8 inch diameter reducing the weight of the snowshoe without compromising its strength.*

### **Product Specifications**

*This kid snowshoe is assembled on a patented WTD decking with traction wings made of co-polymer which is specifically formulated to resist low-temperature impacts (-40 Celsius). Its rigidity is due to the torsion of the wings which, besides offering optimum traction, creates oriented exit holes to discharge snow from the deck. The open rear end avoids dragging effect while walking. Sizes (inches): 7x18 – 8x20.*
