

Faber Snow Shoe Poles

Four legs are better than two! Provide extra stability on unstable or uneven ground. For negotiating icy trails, slippery logs and swift running streams. Snow shoe poles help to provide a more upright & efficient hiking stance thus reducing stress on the knees, lower back and therefore increasing endurance. An "Anti-shock" spring system helps to absorb the impact of each pole plant. Multi-purpose handles allow the pole to be used as a walking stick, a hiking staff or a trekking pole.
